

Sanmin Junior High School

Sanmin Junior High School has promoted students' critical thinking and learning transfer through consistent professional dialogue and interdisciplinary curriculum design. The teacher community has developed diverse assessments to evaluate learning outcomes, guiding students from passive learning to active exploration. By applying generative AI technologies, teachers utilize tools like Perplexity and Claude3 to optimize lesson preparation and design, creating an interactive learning environment and enhancing digital literacy for both teachers and students. Through resource sharing and continuous communication on the cloud platform and ongoing collaboration, teachers have innovated teaching methods, inspired mutual growth and successfully established an effective model for sharing and collaborating on educational resources.
